EMPLOYMENT

New York University Abu Dhabi Center for Behavioral Institutional Design (CBID) Postdoctoral Associate in Economics	2017 – Present
University of Valencia Economics Department, Juan de la Cierva Postdoctoral Fellowship	2016 – 2017

EDUCATION

University of Groningen Ph.D., Sociology <i>Dissertation committee:</i> Arno Riedl, Tom Snijders, Vincent Buskens	2010 – 2015
University of Valencia MSc., Economics, <i>*distinction</i>	2008 – 2010
Industrial University of Santander BSc., Economics	2001 – 2006

JOB MARKET PAPER

The Cost of Social Division

Abstract: At times social groups follow inefficient norms of behavior. Changes in social norms are hard because they are a collective action problem that requires coordination. So, groups may end up socially divided into a fraction that abandons the group norm for a more efficient one and the rest that persist on it. In this paper, I study both theoretically and experimentally the conditions under which social division arises and the consequences it has on coordination and welfare. In the model, efficiency requires all individuals to abandon the inefficient group norm. Thus, social division is inefficient but stable. In the experiment, I find social division to be a prominent outcome across different settings, which has negative consequences in multiple dimensions: (i) individuals that adopt the efficient norm have less chances to integrate with others if they come from a socially divided group, (ii) individuals that persist on the inefficient norm lose social support as part of their group abandons them, and (iii) divided groups display less altruistic behavior towards others, which has distributive consequences. This highlights that partially abandoning an inefficient social norm can have negative consequences beyond those individuals that persist on it.
